

NTN Transmissions Europe Crézancy

ADVANCED FORGING EXPERTISE

DRIVING YOUR PERFORMANCE

Your products deserve reliable, precise and competitive solutions.

As part of the international NTN Corporation Group, and backed by more than 70 years of forging expertise, NTN Transmissions Europe Crézancy designs and manufactures high-performance forged components that are robust, durable and ready for integration.

Our strength

Combining tradition and innovation to deliver high-precision forged components, perfectly tailored to your market requirements.

Hot forging

Screw presses engineered to produce robust, complex components with minimal material consumption.

- Tolerances up to ± 0.5 mm
- Zero material waste through the net-shape forging process
- Cost-efficient production and proven long-term reliability

Cold forging

Advanced hydraulic press technology for outstanding dimensional accuracy.

- Tolerances up to ± 0.02 mm
- Ready-to-use components with functional surfaces manufactured to specification from the outset
- Less machining, greater performance and shorter lead times

NTN certifications

Engineering and co-development

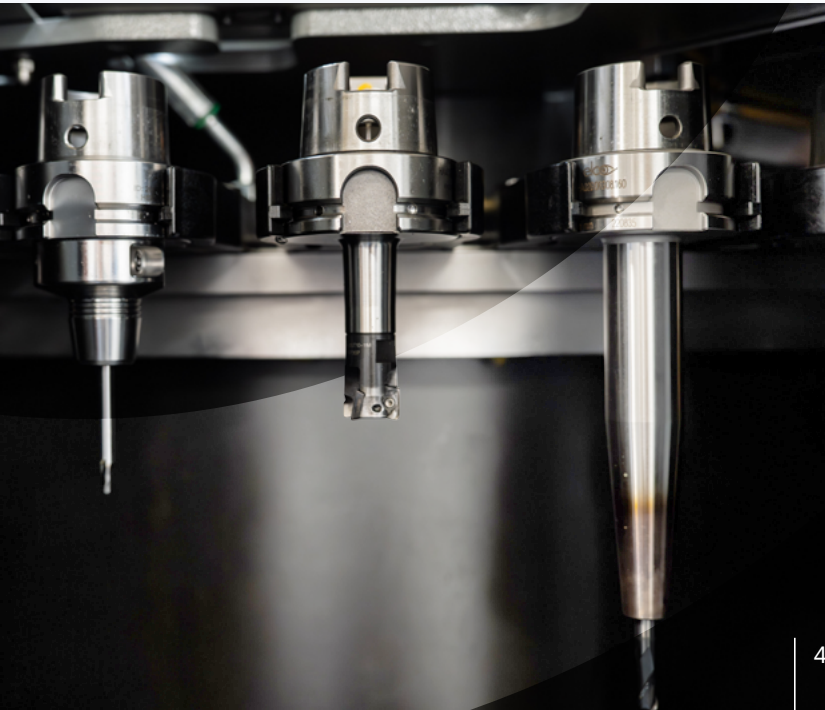

An integrated engineering office to design, simulate and validate your projects from concept through to industrialisation.

- Advanced design and simulation tools (CATIA V5, Forge NXT)
- Rapid prototyping and digital mock-ups
- Technical and economic optimisation of your components

Tooling & quality control

Integrated and fully controlled industrialisation at every stage, supported by our in-house tooling department (CNC lathes and machining centres).

State-of-the-art inspection equipment, including CMMs and 3D scanning technology, ensures uncompromising quality throughout the manufacturing process.

Production flexibility

From prototype development to high-volume production, our forging expertise adapts to the specific requirements of your industrial applications.

- Components ranging from 0.4 to 20 kg
- Small, medium and large production runs

Forged solutions: forged gears, gear wheels, stepped shafts and precision-engineered components.

We provide machining services to deliver ready-to-integrate solutions for your applications.
